THE TRADE WINDOW CENTRE

About TeamFrames

TeamFrames are a trade supplier of PVCu and Aluminium windows and doors. All products are manufactured in our own factory in Eastbourne. This allows us to provide exceptional service throughout the South East.

Our PVCu windows are manufactured in Britain to the very highest standards using environmentally friendly lead free PVCu from the worlds leading extruders, in compliance with recognised industry standards.

All our windows are internally glazed and can conform to Secured by Design, for enhanced resistance to intrusion if specified. Our range of windows has been exclusively designed for the UK's home improvement market. The range includes our standard 70mm casement windows, French , Shaped, Tilt & Turn and Sliding Sash products.

Our doors offer the ultimate in front and back door designs, offering an extensive list of security features, matched with a wide range of styles and features.

All windows and doors can be finished in our standard gloss white PVCu finish or in a selection of woodgrain foils with designer features which provide the security, thermal efficiency and durability expected from a top quality product. Every product is manufactured to the highest standard using top quality components and are subject to rigorous quality checks throughout their manufacture.

THE TRADE WINDOW CENTRE

We offer premium quality windows, doors and conservatories designed and built with you and your home in mind.

Manufactured here in Britain to the very highest specifications and production standards, our products offer the very best in energy savings and security levels.

Available in PVCu, aluminium or timber and in an exciting range of colours and finishes, we can guide you through the process from initial design to a satisfactory installation by one of our accredited installation partners.

We hope you find our brochure both inspiring and informative but if you require more detailed information, please don't hesitate to contact your local accredited Retail Installer.

ALUMINIUM

TIMBER

PVCu

Materials

Our products can be manufactured from three materials - PVCu, timber and aluminium. For ease of use, we have identified each window type with a colour code so that you can easily identify which window types are available in which materials.

PVCu

PVCu (Polyvinyl Chloride–un-plasticised)

PVCu windows, doors and conservatories offer high levels of energy efficiency, security and at a very cost effective price.

Made in Britain from 100% lead-free PVCu and using energy efficient glass, PlatinumNRG utilises the very latest manufacturing techniques and up-to-date engineering processes to ensure our products have the most advanced thermal properties and can achieve 'A+' ratings for energy efficiency whilst also requiring the minimum of maintenance.

TIMBER

A traditional material long-used in the manufacture of windows and doors, timber is a stunning option especially for use in Listed Buildings. However, timber windows and doors are not as cost effective as aluminium or PVCu and normally require much higher levels of maintenance.

ALUMINIUM

One of the world's most abundant and recyclable building materials with a number of unique attributes, aluminium is a great sustainable choice for your windows and doors. Offering thinner profiles than PVCu, aluminium is strong, durable and long-lasting whilst requiring only low levels of maintenance. All our aluminium windows and doors are fitted with the latest multi-point locking systems for complete peace of mind and are available in a wide range of RAL colour options.

Windows

WINDOWS

Windows are an essential part of any building. We continually look through them - at the landscape, the street, the weather - but how often do we look at the window itself?

Windows can instantly reflect the style and character of your property. 'Kerb appeal' is a term often used by estate agents as an important selling tool and it's used for very good reasons. But, when choosing your new windows it's not just visual elements that need to be considered. Whilst the importance of style and character should not be underestimated, energy efficiency and security should equally not be overlooked and can have a huge impact on both lifestyle and returns on investment.

Manufactured entirely in the UK and to the very highest standards, they are one of the best performing window products available on the market today. Our PVCu windows are slender and stylish and are available in 28mm double-glazed or 36mm triple-glazed sealed units, offering the ultimate in sound protection and heat retention.

Our PVCu windows are recyclable and 100% lead free. Our state of the art intelligent design allows us to use 50% less steel, and recycling is done entirely in the UK reducing our carbon footprint still further. Available in a range of fully customisable styles and colours, our innovative profile and hardware designs provide increased security, with selected products able to be certified as 'Secured by Design' an accolade run by the Association of Chief Police Officers.

As well as high performing PVCu, a selection of our windows are also available in aluminium. With their low thermal expansion and inherent strength, our precision engineered aluminium products offer an excellent alternative for use in both contemporary and traditional settings, being available in both white as well as a complete range of RAL colours to your own personal taste.

slimSASH

WINDOWS

The opening vents of these 70mm slim PVCu windows use a special SlimSASH profile exclusive to PlatinumNRG products.

SlimSASH has a larger glass area, allowing more daylight into your home whilst still achieving outstanding energy efficiencies, due to its 6 chambered construction detailing.

These slim profile PVCu windows have a chamfered 'putty-line' external profile, with a choice of matching chamfered or alternative sculptured internal glazing beads if required. Manufactured from high-impact modified PVCu to prevent warping or cracking and with fully welded frames, SlimSASH windows are the very ultimate enhancement to any home.

SlimSASH is available in an extensive range of colour finishes with push button, key-lockable handles also in a choice of colours, so you can easily create the perfect look and style to suit your home. Optional shoot-bolt locking systems and anti-intrusion hinge bolts can also be specified to further aid your security levels, ensuring both sides of your new windows are equally protected from potential forced attack.

ALUMINIUM

PVCu

www.teamframes.co.uk

One of the more recent and innovative additions to our range, flush**SASH** timber effect PVCu windows offer a traditional timber appearance with unique flush-fitting sashes to replicate the original marque, but without the cost and maintenance normally associated with the timber equivalent.

Our flush**SASH** windows are low-maintenance, as secure as all our other windows and they're weather resistant, as well as being fully recyclable at the end of their lifespan.

These traditional style products are crafted using environmentally friendly lead-free PVCu profiles and can be specified with thermally efficient double or triple-glazed sealed units for optimum energy performance.

Our flush**SASH** timber effect PVCu windows can be specified right up to 'A' grade energy ratings and have also been approved by various Local Authorities for use within certain conservation areas. flush**SASH** windows are available in a wide range of authentic woodgrain colour finishes, as well as the more traditional black or white.

Different finishes can also be specified on the inside and outside of the frames to allow for complete personalisation. Dual-colour is a popular choice with this particular product and reflects traditional frames where the outside is painted a different colour to the interior, allowing for greater flexibility with interior decorating.

TIMBER

PVCu

French Windows

Our French windows have all the same great features as our casement windows but with a much larger opening area, providing an elegant solution that meets fire escape regulations where required.

All our French windows are manufactured to the highest standards, using premium quality components which are subject to rigorous quality checks throughout the manufacturing process.

Roller Bolts contract in order to lock the sash. Raising the handle by 90° releases them from the keep and allows the window vent to open.

The upper and lower parts of the locking mechanism contain shoot-bolts as well as the roller bolt, offering up to a 6 point locking mechanism which can be further enhanced by fitting our optional hinge bolts.

The hinges themselves not only enable a full 90° opening but when opened, will slide across to allow access to the outer sash surface from the inside, which gives for easy cleaning of the whole window.

Tilt & Turn

WINDOWS

Offering easy ventilation and cleaning, our dual functioning tilt and turn window is a great addition to any home.

Open it like a door (inwards) or tilt the top of the sash into your room to provide secure ventilation without allowing access into the home, it offers an excellent solution especially if you have young children. They are versatile, secure and easy to operate. With a simple twist of the handle, the window can be tilted inwards from the top for ventilation. Re-closing the vent and then doing another half turn of the handle allows you to open the window the whole way from the side to let the outside in.

The design provides you with a slim, low maintenance, practical window which combines modern styling with easy operation and is perfect for larger window installations or modern extensions.

All our Tilt & Turn windows have the glass fitted from the inside for added security meaning intruders cannot remove it from the outside. Low level black cushioning gaskets increase the visible sight-lines of the product and with an array of glass, colours and furniture options, this product is about as versatile as it gets.

Sliding Sash

WINDOWS

Steeped in history and prestige, sliding sash windows are considered by many to be the most elegant window style. Modern PVCu sliding sash windows are designed to replicate traditional timber and sensitively improve any home whilst still offering a low-maintenance, easy-to-clean window.

Precision engineering makes our sash windows ideal replacement windows if you wish to retain your home's historic charm without the drafts. Sash windows can be tricky to replace and may have to be retained if you live in a conservation area. Our range of modern PVCu sliding sash windows are easy to use, virtually maintenance-free and accepted by most Planners.

Like most of our window offerings, Sliding Sash (Vertical Sliders) can be provided in a range of colours, styles as well as authentic Georgian Bar designs. Tilt facility allows for easy cleaning of the window from the inside, restrictors can be incorporated to help with young children and we can also offer 'Secured by Design' options for that added level of security if you require it.

Doors

The entrance to a property speaks volumes about its owner and adding a new door is the perfect way to really make a statement.

An elegant and stylish entrance door can provide the perfect welcome to your home.

PVCu, aluminium, timber and composite doors offer the ultimate in front and back door design, featuring an extensive list of security features matched with a wide range of styles and finishes. They can be finished in standard white, a selection of RAL colours or a choice of woodgrain and colour foils with designer features which provide the security, thermal efficiency and durability expected from a premium quality door.

Every door is manufactured to the very highest standards using the best quality components available and is subject to rigorous quality controls throughout its manufacture and distribution.

Our exclusive range of doors can be used as front or rear entrance doors and offer a great choice of different styles and colours. Just add your preferred decorative glass and choice of furniture options to offer a fully featured personalised door.

Our doors have been designed for the UK's home improvement market, with our selection including French, bi-folding and patio as well as a comprehensive catalogue of front and rear entrance doors.

Entrance Doors

DOORS

We can offer a comprehensive range of entrance doors in PVCu, aluminium and timber, all being available in a wide range of colours, finishes and formats to best compliment your home.

Eco-friendly PVCu profile uses calcium-based stabilisers rather than lead that many other manufacturers use. Optional aluminium low thresholds offer additional ease of access. All our PVCu doors come as standard with low-line glazing beads and low-profile black gaskets for improved security and improved sight-lines.

All our PVCu entrance doors are fitted with dual weather seals for extra protection against the elements and our special hook bolt locking systems and dedicated hinges ensure peace of mind and a high level of security for your home.

Sealed unit glazing with a range of energy efficient and decorative glass options are also available to you to help you fully personalise the door to your exacting standards.

ANK VIEW
PARTMENTS

Composite Doors

DOORS

Whether you are looking to improve the security or energy efficiency of your home, one of our composite doors is a great choice and will help you achieve both objectives.

Manufactured from thermoset GRP (Glass Reinforced Polyester), the doors are compression moulded to give a high definition panel with an authentic timber appearance.

This provides a thermal efficiency that can be up to nine times that of a normal timber equivalent.

The entrance to a property speaks volumes about its owner and an elegant new door from the composite range will bring a personal touch of style to the entrance of any home.

With steel reinforced frames, 3 dedicated door hinges, multi-point hook/deadlock locking systems tested in accordance with PAS23/24 security standards and optional anti-pick/anti-drill door lock cylinders, you know you are safe with a composite door.

We can ensure a great first impression, lasting durability, style, energy efficiency and peace of mind. An elegant door will bring a personal touch of style to your home and enhance your property's 'kerb appeal' no end.

Solid Timber-core Doors

DOORS

The vast range of FORTREZZ® Composite Doors combines all the benefits of modern materials, state of the art manufacturing and unrivalled good looks...

With a unique and unequalled 48mm thick cross bonded, veneered and laminated solid timber core, the door delivers strength and dimensional stability that simply cannot be matched by other products.

FORTREZZ® Doors are made up of no less than 17 separate laminations which makes the door almost 10% thicker than most other Composite Doors currently on the market today. With such levels of durability, looks and obvious security, our doors offer you complete peace of mind.

FORTREZZ® doors are manufactured in the UK and are compliant with all the required quality standards.

All our FORTREZZ® doors are fitted with the highest level of key locks which are both 3* and SOLD SECURE security tested and approved. There is no better standard available in today's marketplace.

THE TRADE WINDOW CENTRE

Bi-Fold Doors

DOORS

We offer bi-folding doors in a selection of different materials which glide to allow entire façades of your home to be opened, giving you the impression of almost 'living' in your garden.

Few products can offer such a dramatic transformation. When opened, our bi-fold doors are slim and unobtrusive and when closed, they offer all the benefits of a modern doubled-glazed product. Open just one bi-fold panel as an entrance or fold all of them back to draw the ambiance of your garden directly into your home.

Our bi-fold doors can either be stacked open at one end, at both ends, or one panel can be opened like a conventional single door or as a pair. You can choose the same colour for both sides of your bi-fold doors or a different colour for the side that faces into the room should you so desire, the choice is yours.

Our aluminium bi-folding doors are internally beaded just like our PVCu offering, with a soft-line detail to all extended doors and panels and stainless wheels ensuring smooth and consistent operation.

The range also includes a unique flush line pop-out handle that allows for maximum door opening and a low threshold option for improved access. A large selection of aluminium bi-folding doors are available in practically any colour combination.

Patio Doors

Our sliding patio door range comes with all the latest design features included as standard, plus a host of customisable options to add a warm, contemporary feel to any home.

The Patio Plus PVCu door comes fitted with a revolutionary multi-wheeled 'air glide' system, making the sliding perfectly balanced as it glides along the track. The built-in brushes gently sweep away any minor debris each time the door is closed, aiding its silent operation.

With cleverly hidden 'crash' stops in the operating mechanism and a bespoke wrap over threshold to prevent everyday scuff marks, our Patio Plus PVCu sliding patio doors will look as good years down the line as the day they were installed.

Our PVCu sliding patio doors are the most thermally efficient products on the market today, using a uniquely designed 5-chamber system which prevents cold air getting in by trapping the temperature inside.

They also utilise modern locking mechanisms with combinations of hook bolts and shoot-bolts for unparalleled security.

Our aluminium patio doors offer minimal frame design whilst allowing for maximum glazing, multi-point locking and a full range of complimentary handles, RAL colours and security features.

French Doors

DOORS

Our French doors are a beautiful alternative to sliding patio doors and are ideal for traditionally designed homes, bringing a touch of elegance and style with them.

They have the advantage of allowing the full width of the door space to be opened and are available in standard white finishes, woodgrain foil finishes or the comprehensive range of RAL colours when choosing the aluminium alternative.

Our French doors are robust and secure, with multi-point locking security fitted as standard. The locks use a variety of Parrot hooks and rollers with anti-jemmy features, forged to provide superior performance and weather sealing characteristics.

Additional features include PVCu or aluminium low thresholds, a wide range of energy efficient glass types, Georgian Bars (both internal and surface applied), Diamond and Square lead designs and a selection of operating furniture in various colours and styles to personalise the doors to the environment in which they will live.

Finishes

All our windows are available in white as standard but can also be selected in a range of woodgrains and colour finishes.

Standard

Woodgrain

Mixed

You can specify white on the inside of your frames and a wooden grain or colour of your choice on the outside.

Dual-colour is a popular choice and reflects traditional frames where the outside is painted a different colour to the interior, allowing greater flexibility in interior decorating

When it comes to window style, virtually any combination of opening and closing sashes is possible. Here is a selection of our most popular styles, however the chances are you won't see what you want here, so please discuss with your PlatinumNRG installation partner during their visit or take a look at our website for further details.

Furniture is an important consideration for your new windows and doors. A beautiful window or door can easily be ruined by unattractive inferior furniture.

We offer an extensive range of furniture, from window handles and hinges to letterboxes and door numbers and in a number of finishes and styles to suit all types of properties and personal tastes.

Accreditations

BM TRADA Product Certification provides assurance to specifiers, contractors and purchasers that products will perform to an agreed standard. It provides independent certification, testing and inspection, training and technical services all over the world. All of our products are covered by the BM Trada Certification scheme.

Our double-glazed PVCu casement windows can achieve the 'greenest' Window Energy Ratings (WER) rating of A+ for energy efficiency, if specified.

The CE mark is required for all new products that are subject to one or more of the European Product Safety Directives. It is a manufacturer's declaration that their product meets the minimum requirements and enables them to place their product on the construction market.

FENSA stands for the Fenestration Self-Assessment Scheme. Following Government encouragement, FENSA has been set up by the Glass and Glazing Federation (GGF) and other industry bodies, in response to Building Regulations for double glazing companies in England and Wales. When replacing windows and doors, homeowners must comply with current thermal performance standards and ensure they obtain a certificate from FENSA (or similar approved) or Local Authority Building Control.

We are proud to be a member of the British Fenestration Rating Council, the UK's national system for rating Energy Efficient Windows

This is the official UK Police flagship initiative supporting the principles of 'designing out crime'. We are very proud to have gained the Secured by Design accreditation for many of our products.

Secured by Design

License Holder

Window Acoustic Rating

Guarantees

The Window Energy Ratings scheme was launched in the UK by the BFRC, a Government supported independent body which allows consumers to reliably compare one product with another.

The majority of our windows achieve an A-rating for energy efficiency and incorporate the very latest glazing technology using clear energy glass.

UK homes create a quarter of the country's CO² emissions. By offering up to 3 times more thermal insulation than standard double glazing, our windows help eliminate energy loss from your home and are 20% better than Low-E thermally insulating glass.

Our windows were the first in the UK to achieve the BM TRADA Window Acoustic Rating label. We can offer windows in a number of decibel ratings to help in the reduction of sound.

Established in 1984, we are one of the largest producers of windows, doors and conservatories in the South East of England so you can feel secure in the knowledge that we will be around for many more years to come, supporting you via our network of installation partners.

Your guarantee as part of your contract of sale will always be with your installation provider. However, it is reassuring to know that the PlatinumNRG range of products are also covered by a comprehensive set of guarantees from us to our installation partners.
