

COMPOSITE DOORS
Sanctuary

Just 4 steps to your perfect entrance

- 1* Choose your door design
- 2* Choose your door colour
- 3* Choose your glass design
- 4* Choose your hardware

With a range of designs to give your home the presence it deserves, a selection of colours to perfectly fit your personality and a choice of glazing to add that extra sparkle; you won't just open the door when you get home - you'll feel like you've arrived.

<https://build-your-door.com/gat2hjze/sanctuary/about>

We all want to keep our energy consumption to a minimum, not just because of the rising costs, but also our awareness of it's impact on the environment.

Saving energy

One of the best ways we can reduce energy bills is to choose thermally-efficient doors and windows for our homes - keeping the warmth in and the cold out. This not only saves money but it also helps reduce our emission levels.

We all want to keep our energy consumption to a minimum, not just because of the rising cost of energy bills but also our awareness of the impact on the environment.

One of the best ways we can achieve this is to choose thermally-efficient doors and windows for our homes - keeping the warmth in and the cold out. This not only saves money but it also helps reduce our emission levels.

The timber rails that make up the perimeter of the door retain some warmth and insulation.

The 'fielded' panels that make up most of the face of the door release a lot of valuable heat from indoors.

Traditional timber-panelled door

Sanctuary proves to be the most effective insulator thanks to its dense foam core. The outer face stays cold meaning your heat has been retained indoors.

Sanctuary GRP composite door

Doors were tested at the University of Salford's Energy House. This represents a typical Salford 1919 terraced house and its construction represents 21% of the UK's current housing stock. The house has been reconstructed in a fully environmentally controllable chamber, in

which climatic conditions can be maintained, varied, repeated and patterns monitored. For the test, the inside temperature of the Energy House was 25°C with an exterior temperature of 5°C.

Strong and secure

Hook claw locking
Hidden when the door is in use

Opposing hooks are deployed
by raising the door handle

Hooks prevent the door leaf being
pryed open from above and below

Water-resistant

Water-resistant polymer composite rails help keep water absorption away helping prevent any bowing of the door.

Rigid

For improved stability.

Insulated

Tests prove your new door is 17% more thermally efficient than a traditional timber panelled door.

Secure

The reinforced central board gives you extra reassurance that your door is both solid and secure.

Strong

Superior GRP doors have a high impact resistant skin with a beautiful woodgrain finish for an authentic and premium aesthetic.

Our composite doors combine glass-reinforced plastic skins with a polymer frame to create a rigid door structure.

In addition, an engineered timber frame adds further strength and rigidity to the door along with a reinforced central core for security.

The remainder of the door uses an insulated foam filling as used in most modern thermally-efficient buildings.

This design offers the perfect balance of style, security and insulation needed in all British homes.

The perfect balance of style, security and insulation

To match these high levels of insulation, a choice of 12 standard decorative glazing units are available, each with differing amounts of obscurity. These glazing units are triple-glazed as standard, using a 6.8mm laminated safety glass (as a car windscreen) on the exterior pane whilst a 4mm toughened interior glass is used on the inside. These panes encapsulate and seal the 4mm decorative glass used inside the glazing unit. The leads and bevels are protected from the elements by being sealed in, making the glass simple to clean from indoors or outdoors.

Once you've chosen your door design, it's time to turn your attention to the detailing, deciding which glass design suits your home and whether it allows sufficient privacy.

Seeing the light

Designed to retain heat and expel cold, we offer stunning designs ranging from traditional to contemporary. All of which create the perfect finishing touch.

A decorative glazing unit adds style and individuality to your door whilst allowing natural light into your home.

Side-lights

For larger openings, we have a range of matching sidelights that either offer more incoming light whilst retaining privacy, or for restricting all light for complete privacy.

Available across the Traditional range in Esteem, Esteem Arch, Esteem Eyebrow, Elegance Arch and Classical Half Glazed designs.

We have a wide range of hardware available to suit all styles of homes and their individual architecture. Each design is available in it's own range of finishes

which can vary from time to time. Please confirm availability with your Whiteline supplier.

BR0026 Sanctuary Brochure 7th Edition 2024

Door and glass colours shown in this brochure should be used for guidance only as the limitations in photographic and printing processes may mean that colours of products vary from those illustrated. All doors are provided with white internal skins, as standard, although Gold Oak and Rose Wood are also available stained on both sides. All information in this publication is provided for guidance only and is given in good faith. Whiteline reserve the right to alter specifications without prior notice. Reproduction of this brochure in whole or part is strictly forbidden without prior written consent.
